

WELCOME

Welcome to the website of The International Symposium on Sustainable Aviation (ISSA-2017), which will be held in Kiev, Ukraine on 10 - 13 September 2017!

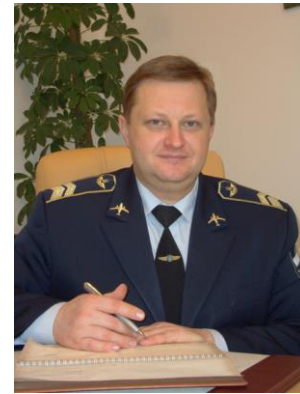

MESSAGE FROM THE SYMPOSIUM CHAIRS

T. Hikmet Karakoc

Oleksander Zaporozhets

Sergii Boichenko

Symposium Chairs On Behalf of the Organizing Committee

On behalf of the Organizing Committee, it is my great pleasure to invite you to the International Symposium on Sustainable Aviation (ISSA), which will be firstly held in Kiev, Ukraine on 10 - 13 September 2017 in the National Aviation University (<http://issasci.org/venue.html>).

Aviation is considered as one of the major sources of environmental problems and at the same moment provides a prominent cause of sustainability. Future trends in aviation could constitute a major impediment to having sustainable development in economic, social and environmental perspectives. Sustainable aviation is a long term strategy aiming to offer innovative solutions to the challenges facing the aviation industry.

As we are living in an era characterized with continuous progress in aviation, we would like to invite researchers, scientists, engineers, practitioners, policy makers, and students to this International Symposium to exchange information, present new technologies and developments, and discuss the future direction, strategies and priorities in the field of sustainability. ISSA aims to handle a broad range of aviation-related issues with particular emphasis on environmental problems associated with sustainability.

ISSA-2017 will include several keynote presentations, specialized oral and poster presentation sessions from the participants on different subjects related to sustainability of the aviation.

We look forward to welcoming you to this remarkable event in September 2017.

Best wishes,

T. Hikmet Karakoc, Oleksander Zaporozhets and Sergii Boichenko
